"All knowledge is in the connections."

→ David Rumelhart

Inevitably, everything connects. People, ideas, objects. At Montgomery Community College, we are in the business of creating connections to disseminate knowledge: by learning each student's name, by discovering their goals, by understanding their needs, by engineering their success. It is our goal to put students in touch with people, information and resources that will in turn, help students make connections of their own.

Some individuals need to connect to a new set of job skills (see Jamal Moore's story on page 4). The NCWorks Career Center helps with access to training and education programs which, in turn, helps connect individuals to jobs.

Some individuals are looking for assistance to start or grow a business (see page 6). The Small Business Center connects these individuals with experts who can show them the ropes, and with resources to help them improve their opportunities for success.

Montgomery Community College connects with instructors, artists, craftsmen, business leaders, medical professionals, and other specialists who bring their connections into the classroom. Professionals like Mark Arnold (see page 8), share their knowledge and expertise for the love of the subject matter. The students come to their classes because learning is fun.

Students of all ages and from all walks of life come back to school to earn a high school or college credential to fulfill a lifelong dream, like Sherry Calloway (see page 14), Grant Hinson, and Sam Weitzner (see page 16).

Others want something more, and they come to MCC to connect to career advancement; like Garrett Gooch (see page 20), or to a new career; like Cheyanne Lea (see page 18), Jonni Garcia, and Justin Georgepul (see page 22).

MCC connects people with other people, ideas, and resources that enhance skills, advance careers, and open doors to more connections. Connect to someone at Montgomery Community College today to see what we can do for you.

Jamal Moore Connects to Job Skills in Human Services Field

a lot of things and went through a lot of things. I was in trouble with the law. I wasn't showing up to class or handing my work in on time. My GPA was non-existent. I was doing my own thing and I suffered the consequences," Jamal said.

Jamal left MCC on academic probation. During the intervening years he matured. He moved to a new church and began to get serious about his life.

"I was at a conference and a preacher told me God was going to give me a makeover, and that's exactly what he did," Jamal said.

After making his mistakes, he didn't cling to them, but slowly began moving forward. He started taking classes again in the summer of 2017 to bring his GPA above probationary status, which he did.

"That's when I met Russell Ingram," Jamal said. Russell is the NCWorks

Jamal graduated from Montgomery Learning Academy in the spring of 2012. That fall, he enrolled at Montgomery Community College. With help from the JobLink Career Center, he entered the Building Futures program which helps at-risk students. He joined the Minority Male Mentoring program where he worked with mentors to help him personally and academically. The programs were designed to give Jamal the support he needed to succeed, but Jamal wasn't ready.

Center Director at Montgomery Community College. Russell assists the center's clients with finding the training and education they need to get jobs. Up to that point, Jamal had been paying for classes out-of-pocket from his very limited resources.

"I didn't want my parents to bear the burden of paying for my education. Russell got me the financial help I needed to pay for the rest of my schooling," Jamal said.

Jamal said he wouldn't have known about NCWorks and its services unless someone told him about it.

"Now I want to tell others that help is out there if it's needed. You have to have some kind of financial need, but it's out there," Jamal said.

In the fall of 2017, Jamal said he 'officially' left his past behind him.

"I re-enrolled in the Human Services program, registered for classes, and right before school started in the fall of 2017, I got baptized and I left the past in the past. I called my teacher and told her I wanted to take as many classes as I could," said Jamal.

It was a giant leap of faith for both Jamal and his former teacher, who knew him when he first enrolled in the Human Services program in 2012.

"I think she saw that I was ready to learn," he said. "She was right there the whole time supporting me. She taught me to believe in myself. Now I believe I can help others, too."

Jamal now volunteers with a nursing home ministry, a food ministry and a prison ministry. He has earned several certifications through the NC Organization of Human Services, through MCC, FirstHealth, and the Sandhills Center. He's done internships and participated in programs that help the community through a variety of outreach activities, and he's just getting started.

"I'm now officially a national recording artist, and my GPA is above average," Jamal said proudly. "My instructor saw the change in me and my parents noticed the change. My whole life changed," he said.

"After I get my degree, I don't know where I want to go but I believe the Lord will lead me where he wants me to go. I want to help whoever needs it, wherever I can," Jamal said.

For classes that will connect you with job skills, see page 29.

NCWorks

works for you!

Our mission is simple:

We help people in North Carolina find jobs.

At the NCWorks Career Center we also connect you with:

- Career assessment guidance
- Access to training and education programs
- Resume and cover letter preparation
- Assistance with a job search, and more!

Introducing Savannah Heath, New Small Business Director

Savannah actively carries forward the mission of the SBC to provide counseling, resources, training and other services to the community and small business owners and entrepreneurs. Savannah holds a Bachelor of Science degree in Business Administration in Marketing from the University of North Carolina at Charlotte. She is currently pursuing her MBA in Marketing at Louisiana State University-Shreveport. She has worked in the community college system for two years and has a strong passion for small business and advocating for rural communities. As a Montgomery County native, Savannah is committed to serve her community to create innovative partnerships, secure economic development, and ensure her community has the proper resources to thrive and prosper.

BUSINESS SUMMITS

Uwharrie Agribusiness Summit

Experience a one-day conference developed by agribusiness for agribusiness. Cultivated through collaboration with Stanly and Montgomery Community Colleges, this day-long event will help current and prospective agribusiness owners grow their own skills for success.

10/24 | W | 9 AM-5 PM | Location: Stanly Community College

Uwharrie Crafts Summit

Experience a one-day conference specifically designed to address needs and challenges faced by current and prospective craft artist business owners. Arts-based businesses are unique ventures and require special business planning methods. This don't-miss, one-day event will provide the tools needed to move your business forward. Take this opportunity to network with fellow creatives and experience the power of collaboration along the way.

10/25 | TH | 9 AM-5 PM | Location TBA

Mark Arnold has been recognized as a 2018 Emerging Artist and was featured in the April 10, 2018 issue of *Ceramics Monthly*. Mark recently presented a handbuilding workshop at Montgomery Community College for the Pottery program.

Mark produces press-molded, wheel-thrown, and handbuilt stoneware made with colored terra sigillata. Roughly translated, terra sigillata is 'sealed earth' and refers to a technique inspired by ancient Roman pottery. Many of his pieces resemble a patchwork quilt. Arnold uses a final layer of black wash over the pieces to highlight the surface imperfections, resulting in a weathered look.

MCC's Heritage Crafts Coordinator, Josh Floyd, first met Mark at The Functional Ceramics Workshop in Wooster, Ohio. At that time, Mark was an

Connecting with Mark Arnold: Emerging Artist

undergraduate and Josh was working at Laguna Clay Company. They struck up a professional friendship and bumped into one another at conferences through the intervening years.

"When Mark moved to Columbia, NC, I reached out to him pretty quickly for a workshop. I knew he would be in high demand," said Josh.

Josh says the ceramics community is a large, but tightly-knit group of artists where "everyone knows someone who knows someone. We've all got some kind of connection that often evolves into a really great relationship. Whether it's through a former instructor, a shared workshop experience, or just proximity, we are all connected by our passion for clay," Josh said.

POTTERY CLASSES

Beginner Wheel Class

9/10-11/5 | M | 1-4 PM | \$72

This is an 8-week class for students with no experience working on the potter's wheel.

Advanced Studio Pottery

8/20-12/3 | M | 6-9 PM | \$127

Experience is required for this 16-week open studio class which includes wheel throwing and handbuilding.

Advanced Studio Pottery

10/15-12/3 | M | 6-9 PM | \$72

Experience is required for this 8-week open studio class which includes wheel throwing and handbuilding.

Beginner Handbuilding

10/15-12/3 | T | 6-9 PM | \$72

Learn the basic techniques of coil and slab building pots and sculptures with guided projects. Beginners and advanced students welcome.

Advanced Studio Pottery

8/21-12/6 | T or TH or F |

9 AM-4 PM | \$182

This is a one-day-a-week class for experienced students. Students may attend either Tuesday or Thursday or Friday, once per week with instructional class time.

Advanced Studio Pottery

8/21-12/6 | TW OR WTH | 9 AM-4 PM | \$182

This is a two-day-a-week class for experienced students. Students may attend either Tuesday or Thursday with instructional class time, with open studio access on Wednesdays.

The Ins and Outs of Brush Making with Troy Bungart

8/25 | SA | 9 AM-5 PM | \$96

Troy is a great brush maker, popular with many potters throughout the US and abroad. An accomplished potter, Troy will guide students through all the aspects of making artists' brushes and exploring their uses.

“We've all got some kind of connection that often evolves into a really great relationship...we are all connected by our passion for clay.”

-Josh Floyd, Heritage Crafts Coordinator

Liam Hoffman Returns to MCC

Youngest ever Forged in Fire champ, Avery County NC native, blacksmith and bladesmith Liam Hoffman reconnects with MCC this fall for a two-day workshop. Liam is the owner of Hoffman Blacksmithing and author of *Forged: A Guide to Becoming a Blacksmith*. Liam's expertise extends to the classroom as he shares his own experiences at becoming an accomplished blacksmith and bladesmith.

KNIFEMAKING CLASSES AND SPECIALTY WORKSHOPS

Advanced Forging and Blacksmithing With Bill Bisher of Black Turtle Forge

9/4-11/20 | T | 5:30-9:30 PM | \$226.60

MCC welcomes Bill Bisher back to teach another semester-long class exploring knife forging, tools for blacksmithing, shop set-up and more. The class will include the finishing of blades, handle materials, grinding etc. This is an advanced forging and blacksmithing class. At least one other knifemaking class is required.

Basic Blacksmithing and Forging With Liam Hoffman

10/5-10/6 | FSA | 8 AM-6 PM | \$146.60

Learn the fundamentals of blacksmithing with popular NC blacksmith and knifemaker Liam Hoffman in this beginner-level course. Focus on proper hammer technique and control, ergonomics, essential and luxury tools, and the techniques needed to make any project in your forge.

Intro to Bladesmithing With Gabe Mabry

9/5-11/28 | W | 4-8 PM | \$226.60

This is a beginner knife forging class, but advanced students are welcome. The focus of this class will be on how to achieve a high-performance, forged blade. Learn a variety of techniques that will enable you to forge, heat treat, and grind a blade, including all steps in between.

Fixed Blade Knives With Ed Vanhoy

9/13-9/15 | THFSA | 8 AM-6 PM | \$201.60

A class that introduces first-time knife makers to the processes of completing a finished knife blade. The student will start with an understanding of knife anatomy, types of steel, basic layout design, basic heat treating, and basic knife finish. Students will complete one finished knife blade.

Stock Removal Basics With the Jones Brothers

10/25-10/27 | THFSA | 8 AM-6 PM | \$201.60

Beginner and advanced students are welcome to this basic knife class using the stock removal method. Learn the basics of profiling, grinding, heat treating, handle constructing, and finishing. Class includes materials for one knife.

Tanto Knives With Daniel Pica

9/28-9/30 | THFSA | 8 AM-6 PM | \$201.60

A beginner-level course on the history, design, grinding and sharpening this multi-bevel design. Students will work hands-on with the goal of completing one Tanto knife of their own by the end of the three-day course.

Leather Sheaths for Knives With Travis Daniels

11/8 | TH | 6-9 PM

11/9-11/10 | FSA | 8 AM-6 PM | \$201.60

Learn the basics of leather working for creating knife sheaths. Bring your own knives and make sheaths for them.

Knife Sharpening 101 With the Jones Brothers

11/17 | SA | 8 AM-6 PM | \$80

Bring your own knives to learn the basics of manual sharpening of knife blades. Will cover both plain and serrated edges, and discuss the tools and options for sharpening at home.

Christmas Knife Class With Ed Vanhoy

11/29-12/2 | THFSASU | 8 AM-6 PM | \$201.60

Students will start with raw metal and leather and construct a full knife and sheath. Topics will include the functions of knife forms and anatomy of sheaths and fixed blade knives. The finished knife will make a great Christmas gift for someone, or for you!

TAXIDERMY

Continuing Education (non-credit) Taxidermy classes are concurrent with Taxidermy diploma (college-credit) classes, however Continuing Education fees are less than half that of regular tuition and fees.

Continuing education scholarships may be available for this class.

Bird Taxidermy - Complete Series

8/15-12/17 | MTW | 9:30 AM-6 PM | \$619.80

Develop skills to flesh, mount, and finish your own bird in an open studio with individual, hands-on instruction.

Bird Skinning

8/15-9/24 | MTW | 9:30 AM-6 PM | \$206.60

Bird Mounting

9/25-10/31 | MTW | 9:30 AM-6 PM | \$206.60

Bird Finishing

11/5-12/17 | MTW | 9:30 AM-6 PM | \$206.60

**Fall Beekeeping: Preparing Your Hives for Winter**

9/10-10/15 | M | 6-8 PM

9/22, 10/13 | SA | 10 AM-12 PM | \$35

Try this for a sweet hobby! This class will cover basic bee-ology, managing hives, treating pests and more. Learn how to prepare and provide for hives during the winter months. The class will include two, Saturday off-campus hive visits. Something for new-bees and seasoned beekeepers alike!

**Multimedia Art
With Joe Grebner**

9/18-11/20 | T | 9:30 AM-2:30 PM | \$125

A fun, low-pressure class for beginners through advanced artists. Professional artist Joe Grebner introduces materials, techniques, concepts and processes for understanding visual arts. Express yourself through exploration of different media. Scholarships available.

**Basic Basket Weaving
With Chip Badgett**

9/10-10/29 | M | 6-9 PM | \$95

Chip introduces basic techniques for beginner basket weavers. Some materials are included. Students may work at their own speed and may purchase additional materials for additional baskets.

WOODWORKING**Adirondack Chairs**

9/14 | F | 5-9 PM & 9/15 | SA | 8 AM-5 PM | \$175

This is a guided class that takes the student through the process of building their own Adirondack chair. Students will be taught to use a miter saw, router, staple gun, drill, and various hand tools. Price of the class includes materials and the student will take home their own Adirondack chair.

General Woodworking

9/5-10/10 | W | 6-9 PM | \$96.60

Learn the basic tools for safely working with wood. Students will develop skills with the table saw, planer, jointer, miter saw, band saw, drill press, and router. Students will work on various hands-on projects to take home.

• • • FITNESS CLASSES

GetFit StayFit Fall Boot Camp

8/20-10/29 | MTH | 6-7:15 PM | \$45

GetFit StayFit boot camps are designed for maximum calorie burn in the shortest amount of time. Get fit, get healthy, challenge your mind, challenge your body, and most importantly, have fun.

GetFit StayFit Kettle Bell Pump

11/5-12/20 | MTH | 6-7 PM | \$30

From strengthening the key muscles of the lower body to challenging the muscles of the core and upper body, kettlebells truly are a highly effective training tool for improving total-body strength.

Sherry Calloway was out of school for ten years raising a family when she decided to go back to get her adult high school equivalency at Montgomery Community College. Once she enrolled in the program and began taking classes, she realized she enjoyed learning.

"It felt good to go back to school," Sherry said.

She attended classes every day and it didn't take long for Sherry to accomplish her goal. Six months after she started, she finished. But during that time a seed was planted and began to grow.

Sherry worked for a time as a home health aide and always wanted a job helping people. While attending classes at MCC, she became interested in the Medical Assisting associate degree program. She spoke to her adult high school instructor about it.

"I told her I was interested and she talked to the instructor for me," Sherry said.

Sherry's instructor helped her transition from adult high school to a college-level program of study. That fall, she enrolled in the Medical Assisting program.

While Sherry had a good start, there was still some catching up to do. Her assessment scores indicated she needed some foundational math classes to help her reach college level.

Going from an HSE to an AAS: One Student's Journey

Many students take foundational courses to help them in the areas of math, reading and English. Once a strong foundation is built in these areas, students find they have better success in college-level courses.

"There is a big difference between adult high school and college," Sherry said. "You have to come to class every day so you don't miss anything. There is a lot more studying and you have to stay with it," she said.

Sherry said her instructors helped her stay focused and encouraged her when she struggled.

She said her children are also encouraged watching her sticking with it, even when it's hard.

"They see me doing it and they want to do well, too. I teach them never to quit. To keep going and never quit," Sherry said.

Sherry has one more year of college left and then she wants to fulfill her dream of helping others by working in a medical office.

"You're never too old to accomplish whatever your dream is," Sherry said.

All College and Career Readiness classes are free of charge.

Please call 910-898-9680 or 910-898-9678 to schedule your orientation!

Criminal Justice: Connecting to a Four-Year College Credential

Sam Weitzner and Grant Hinson graduated this year with an associate degree from Montgomery Community College's Criminal Justice Technology program. Coming into the program, Sam wanted to be a law enforcement officer and Grant wanted a career where he could make a difference in people's lives. The more they learned about the protective service field however, their goals expanded.

"I learned about all the various roles that the criminal justice system plays from the courts, to the law enforcement operations. My goal now is to complete my bachelor's degree and become a juvenile court counselor," Grant said.

According to Criminal Justice Department Chair, Tracey Wyrick, sometimes students

are surprised at the scope of the protective service field.

"Once they understand the far-reaching opportunities it's like the lightbulb suddenly goes on, and they get really excited about what they want to do," Tracey said.

"The more I learned, I made bigger goals. The program changed what I saw was possible for me," said Sam. "I'm going to transfer to Pfeiffer (University) and get my bachelor's degree in criminal justice."

Graduates with an associate degree in Criminal Justice from MCC can transfer their credits into bachelor's degree programs at Pfeiffer, Gardner-Webb, or Pembroke University with advanced status through a special agreement MCC has with those colleges.

"By taking their first two years of college at MCC, students can save thousands of dollars on tuition costs," said Tracey. "And with a four-year degree, they open up even more opportunities."

Sam Weitzner

Grant Hinson

Sheriff's and police officers
5.4 jobs per 1,000

Sometimes students are surprised at the scope of the protective service field.

"Once they understand the far-reaching opportunities it's like the lightbulb suddenly goes on, and they get really excited about what they want to do."

-Tracey Wyrick,
Criminal Justice
Department Chair

Cheyanne Lea worked at a veterinarian's office since she was in high school. She enjoyed the work but needed a better job that would help her pay the bills and would provide benefits.

"I chose phlebotomy because I assumed sticking people (with needles) wouldn't be any different than sticking animals. If I stuck an animal that was trying to bite me, I could stick a human," said Cheyanne.

Phlebotomy (fluh-**bot**-uh-mee) is the practice of drawing blood. Montgomery Community College offers a diploma program and a continuing education program that teaches it. Cheyanne opted for the continuing education version which includes the identical core courses as the diploma version, but without earning college credit.

"I have a two-year-old at home and I needed something that would be quick to do that would get me a good job afterward," Cheyanne said.

The program took Cheyanne just six months to complete, including a clinical practicum where students receive supervised experience performing blood collections in a health care setting. Cheyanne said that she worked hard and went the extra mile at her clinical site so her supervisor would know she was serious about her work.

Train Fast for a New Career in Phlebotomy

"Amanda Beaman (her instructor) told us when we go into clinicals to treat it like a job because sometimes they will hire you," said Cheyanne.

Cheyenne's efforts paid off. She was hired on an as-needed basis by Randolph Health, but by the end of the week she had a full-time job.

"They told me they originally wanted someone with experience. But when they saw me work and what I did, they said I knew what I needed to know and they hired me." Cheyanne said.

Cheyenne credits MCC for giving her the skills she needed to get her job.

"Amanda was amazing. I could message her at night or on weekends and she would text me right back with the answers to my questions. She cared if we passed or not and worked with us so we could succeed," Cheyanne said.

Now Cheyanne 'sticks' humans instead of animals. Laughing at her previous assumption, Cheyanne said that drawing blood is only one small part of the phlebotomist's job.

"Sticking animals is different from sticking humans," she said. "You learn to have the same respect for your patient as you have for your own family member. We all stuck each other in class many times and there's a lot more to it than just collecting a specimen."

To connect to someone about becoming a phlebotomist, call Amanda Beaman at 910-898-9708.

ALLIED HEALTH OCCUPATIONS

To be eligible to register for Nursing Assistant and Phlebotomy classes, applicants must complete a pre-registration checklist. For more information about getting started, please contact Donna Harwood at 910-898-9706, Riley Beaman at 910-898-9683, or the Continuing Education Department at 910-898-9672.

Degree Connects Criminal Justice Graduate to Career Advancement

When Garrett Gooch first began working for the Troy Police Department in 2012, it didn't take long before he began having conversations with his chief about going back to school.

"I wanted to better my career, and education is important. In the long run, it improved my chances for promotions," said Garrett.

Garrett had already taken Basic Law Enforcement Training, which meant that 18 hours of college credit could be transferred into MCC's Criminal Justice program, making him one semester closer to getting his associate degree.

"Any sworn law enforcement officer automatically has 18 credits that will transfer into our associate degree program," said Tracey Wyrick, Criminal Justice Department Chair at MCC. "Many officers take advantage of this because it helps them advance in their careers."

Garrett was able to take all his classes online, which was necessary because of his work schedule.

"The only thing I did in person was pay for my classes," said Garrett. "The good thing about it was everything was very professional. Tracey Wyrick and the other instructors were good about responding to email quickly. Basically, it was like I was in a seated class," Garrett said.

While Garrett was taking classes, he applied for a position as a North Carolina Wildlife Officer. Only 20 candidates were chosen for the Wildlife Academy among 1,200 applicants.

"That I was completing my degree was a factor in my getting into the Academy," Garrett said. Garrett's education paid off, and he became an NC Wildlife Officer just one month after graduating from MCC with his associate degree in Criminal Justice.

TOP TEN 5-STAR JOBS
PINEHURST-ROCKINGHAM REGION
 with postsecondary training

Occupation	Median Annual Wage
★ Licensed Practical Nurses.....	\$43,552
★ Computer User Support Specialists.....	\$43,822
★ Heavy & Tractor-Trailer Truck Drivers.....	\$33,951
★ Medical Assistants.....	\$29,930

★ Surgical Technologists.....	\$37,405
★ Nursing Assistants.....	\$22,760

North Carolina Star Jobs is a simplified way to help you identify occupations promising in your region. Star ratings are based on wages, projected growth rate, and projected job openings. Occupations with 5 stars are considered to have much better career prospects than occupations with fewer stars. Top careers are grouped by education requirements.

**TRAIN FOR YOUR
 5-STAR CAREER AT**

**MONTGOMERY
 COMMUNITY COLLEGE**

Jonni Garcia

Work Days, Train Nights

• **Connect
to a New
Career in Law
Enforcement**

Is it possible to train to be a law enforcement officer while working full-time? The answer is yes!

Many people put off an education, thinking they cannot attend school and work full-time. Jonni Garcia was one of those people.

"I always wanted to be a law enforcement officer but I was procrastinating about doing it. There was never enough time or I was always too busy," said Jonni.

When he discovered MCC had an evening Basic Law Enforcement Training (BLET) program, he finally decided to follow through.

Justin Georgepul took BLET when he was just 25, but never pursued a job as a law enforcement officer, and allowed his certification to lapse. Instead, he got a job with a heating and air conditioning company.

"After my first day I realized I didn't want a career doing that," Justin said. He continued to work until the day he attended the funeral of a family member who was a retired law enforcement officer.

"A lot of law enforcement people attended the funeral and they asked me why I was still doing heating and air," Justin said. It was the turning point for him.

Justin and Jonni both attended Basic Law

Enforcement Training while working full-time jobs.

"If it wasn't for an evening class, I couldn't have done it," Justin said. "My boss was very supportive," he added.

Justin began working for the Candor Police Department the day before the Peach Festival last year. Jonni began working for the Troy Police Department in May 2015, one month before his graduation at MCC. Both worked and attended school at the same time, but said it was worth the sacrifices they made.

"You have to put your heart and mind into it, and you have to have a calling for it. You have to be ready to accomplish it and be successful. It was a strenuous journey, but it was worth it," said Jonni.

In order to become a law enforcement officer in the state of North Carolina, candidates must take a Basic Law Enforcement Training course from an accredited program. To be eligible to apply for the program, candidates must be at least 20 years of age by the time they complete their training, have a high school diploma or equivalent, pass a criminal background check, and have a sponsorship from a North Carolina law enforcement agency.

The 632-hour program culminates in a state comprehensive exam and skills test. MCC offers BLET as an evening/weekend program that takes about eight months to complete.

For information about Basic Law Enforcement Training at MCC, or for help connecting with a sponsoring agency, contact Pete Herron at 910-898-9710.

LEAVE A LEGACY

In 2018, a Montgomery County donor made a significant **matching** gift to the Montgomery Community College Foundation. Gifts that were made to the 2018 annual fund were matched up to \$15,000 - doubling their impact!

We invite others who desire to make an impact to create a legacy through one of our many giving options.

Charitable gifts made to the Montgomery Community College Foundation can be made in the form of matching funds, planned gifts, bequests, gifts of stock or securities, life insurance, charitable gift annuities, or charitable remainder trusts. All gifts to Montgomery Community College Foundation are tax deductible.

Early Childhood Education

The Early Childhood Education program is now offering three separate tracks!

We are your connection to:

- A Career in Child Development
- A University Transfer Program
- Licensure

The Licensure Track

Identical to the University Transfer Track with the addition of preparing you for the PRAXIS Core Birth-to-Kindergarten (B-K) licensure. Enter any North Carolina System university B-K Early Childhood bachelor's degree program with advanced placement status.

The Career/Technical Track

Get an associate degree in Early Childhood Education if you want a career working in a child development center or preschool. Your first year of classes is identical with the other tracks, so if you decide to go in another direction, you're still **RIGHT ON TRACK**.

The University Transfer Track

Get an associate degree in Early Childhood Education that will transfer to any University of North Carolina System university and also to many private NC colleges and universities in their Birth-to-Kindergarten programs.

Find out more about how you can connect to MCC's Early Childhood Education program. Contact Amy Frieary at 910-898-9709, or friearya@montgomery.edu.

Student Finds Strength, Support to Complete Degree

When Mercedes Christian graduated from West Montgomery High School in 2011, she had her future all planned out. That fall, she began attending NCA&T.

In her second year there, her baby girl was born. Shortly thereafter, an unexpected blow fell.

Mercedes was diagnosed with congestive heart failure with pregnancy onset which didn't respond to medication. She was only 20 years old.

While doctors worked with Mercedes trying various treatments, she took time off from school. She wondered if she would be wasting her time going back, or even if she would live long enough to raise her daughter.

"That was a very low point for me," Mercedes said. Over time, her condition seemed to stabilize and so she decided to get on with her life. In August 2015 she enrolled in the Early Childhood Education program at Montgomery Community College where she could be closer to home and to her support system.

In November of that year, the second blow fell. At a routine check-up with her cardiologist Mercedes was told she had lost all but 5% of her heart function and that she needed to be admitted to the hospital immediately.

"I wanted to tell my doctor, 'No, I'm not going to the hospital,' but he was serious. I didn't have an option," Mercedes said. After going through more tests, Mercedes was given two options:

either stay on a heart pump for the rest of her life or have a heart transplant. She wasn't ready for any of it.

"I just had a complete breakdown," Mercedes said. "I was in a step-down unit for two weeks where they were keeping me stable. Finally, I knew whatever happened was going to happen." She decided to have the transplant. "I finally got peace," she said.

Mercedes was placed on a transplant list and was moved to the ICU where she stayed on a heart pump until a heart could be found for her. While there, she stayed busy.

"I wanted to finish my classes, so I was doing my schoolwork," Mercedes said. She contacted her instructor who told her to take time off if she needed it.

"I didn't take time. I told her I had to finish. I felt like if I took time, I would keep taking time and never would come back," Mercedes said. She was thinking about living, not dying.

On December 13 Mercedes got a new heart. On December 23 she was able to go home in time to spend Christmas with her family. She still had a long way to go, but she was anxious to get there.

Mercedes went back to MCC in January to finish what she started. She was able to take all of her classes online, allowing her to do her schoolwork between follow-up medical appointments and monthly biopsies.

"The stress would have made it impossible to do that type of workload without the support of my instructors," Mercedes said. "Both Ms. Brown and Ms. Frieary were a strong support system helping me complete classes and pushing me toward my goal."

After her experience, Mercedes' goals changed along with just about everything else in her life.

She still wants to work with children, but on a different level.

"I want to do some type of humanitarian work. I feel like I have an understanding of what kids go through when they have challenges. I want to help kids," she said.

Mercedes graduated with her associate degree in May. She said it was a bittersweet experience, but one that made her proud.

"Completing my associate degree was a way of showing my appreciation for life. I don't think people understand the difference between living and being alive. None of us learn how to live until something happens to make us appreciate life," she said.

Mercedes said she has something to tell the world, and she doesn't want it to go to waste.

"You have to have your own life-changing experience. You're in a storm for a reason. Don't cry about it, you have to get through. If you sit there, you're going to stay in it. But I don't think anybody's advice can do justice to what people are going through. They're just words, and sometimes that's not enough. Words without understanding are not enough. There is nothing I can say besides keep the faith. It takes breakdowns, retraining your mind, your support system. It takes a force. You can't do it alone. You need strong support," she said.

Mercedes found the support she needed to complete her degree at MCC.

Continuing Education Schedule

Continuing Education classes are added throughout the semester. For a complete listing of classes please visit our website at www.montgomery.edu/futurestudents/continuing-education.

If you have never attended Montgomery Community College, you may follow these steps to help you get started on a degree, diploma or certificate:

1. Visit www.montgomery.edu/apply to complete the NC residency determination process and the online admission application.
2. Submit an official high school or equivalency (i.e., GED®) transcript and official transcripts from all colleges attended.
3. Take any required placement testing when notified by our enrollment office.
4. Apply for financial aid at www.montgomery.edu/financialaid.
5. Make an appointment with your academic advisor to schedule your classes and register.
6. To complete your registration, pay tuition and fees online via WebAdvisor or in person at MCC's Business Office. A payment plan option is available during specified dates. For payment plan information visit www.montgomery.edu/business-office. If you have applied for financial aid, you may check the status of your application through your WebAdvisor account.

REGISTRATION

Advising & registration for new students: please call 910-898-9600 for an appointment

Late registration: August 9, 2018: 9:00 AM - 12:00 PM & 4:00 PM - 7:00 PM

Submit your application now for fall term!

ACADEMIC CALENDAR

Fall Semester 2018

August 9	Late registration
August 15	Classes begin: 16 week, 1st 8-week, 1st 4-week
August 24	Last day for partial tuition refund
August 27	14-week session begins
September 3	Labor Day Holiday
September 17	12-week session begins
October 10-12	Fall Break
October 15	Mid-term
October 16	2nd 8-week session begins
October 22-November 2	Advising for spring semester (current students)
November 1	Financial aid priority deadline for spring term
November 5-16	Advising & registration continues - all students
November 12	Last day to drop a course with a "W"
November 20-24	Thanksgiving Holiday Break
December 14	Term ends
